Safeguarding & protecting people: Government Guidance charities & trustees

Protecting people & safeguarding responsibilities should be a governance priority for all charities. It is a fundamental part of operating as a charity for the public benefit. As part of fulfilling duties as a trustee, reasonable steps must be taken to protect people from harm who come into contact with charities. This includes people who benefit from the charity's work, staff, volunteers & anyone else who comes into contact with charities. The Charity Commission will hold trustees to account and will check to see whether trustees followed this guidance and the law. Trustees are expected to take responsibility for putting things right. Trustees should promote fair, open and transparent culture to ensure that all involved feel able to report concerns & that they will be listened to. More information about the government guidance can be found [here](#)
